Virtualization

a HPE SMB Solution

Virtualization – Run multiple applications on a single server

Challenges

- Supporting an increasing number of workloads
- Limited budget
- Limited in-house IT skills
- Decrease server sprawl and power costs

Virtualization – Run multiple applications on a single server

Benefits

- Run multiple applications on a single server
- Solves the underutilized server issue
- Space and budget of a single server
- Reduce unexpected interruptions or unavailability

HPE Small Business Solutions for Virtualization

Run multiple applications on a single server

HPE ProLiant Gen10 Plus

Support up to 33 vCPUs

Micro to large solutions, starting with HPE ProLiant MicroServer Gen10 Plus v2 to DL380 Gen10 Plus

HPE ProLiant Gen11

Support up to 92 vCPUs

Small to extra large solutions, starting with HPE ProLiant ML110 Gen11 to DL385 Gen11

Database & Applications

a HPE SMB Solution

Database & Applications – Host line-of-business apps and data on-site

Challenges

- Keep pace with growing database sizes
- High costs of hosting databases and applications in the cloud
- Slow application performance
- Security of data and applications is out of business' control

Database & Applications – Host line-of-business apps and data on-site

Benefits

- On-site solution
- Greater control and security over database and applications
- Improve application performance
- Avoiding frequent internet outages or slowdowns
- Avoiding costly cloud-based services

HPE Small Business Solutions for Database & Applications

Host line-of-business apps and data on-site

Database

Database optimized configurations feature **Low core-count / high frequency CPU's** with **mixed-use** solid-state drives (SSDs)

Choice of HPE ProLiant Gen10 Plus servers from micro (2X 960GB **SATA MU SSD** and **4c**) to extra-large Gen11 (6 X960GB **SATA MU SSD** and **16c**) configurations

Applications

Application optimized configurations feature **Mid core-count / Mid-frequency CPU** with lower cost **read-intensive** SSDs

Choice of HPE ProLiant Gen10 Plus servers small (2X 960GB **SATA RI SSD** and **4c**) and Large (3 X 960GB **RI SSD** and **32c**) configurations

Hybrid cloud ready: Microsoft® Azure® and partner cloud services

HPE SMB Solutions for Database & Applications

Host line-of-business apps and data on-site

Database

- **High-frequency financial applications**
- **Online digital** marketing / **warehouse stock management**
- Enterprise resource planning (**ERP**) and customer relationship management (**CRM**) **data storage**
- Applications that have **integrated databases** or store the application data within the application file system
- **Highly dynamic OLTP databases** for applications that use an external database

Applications

- **Small business accounting/tax apps**
- Industrial **warehouse inventory**
- Small retail / **point of sale** (POS)
- Web app front end
- **Light to medium** graphical applications (media, geoscience, architectural)
- **Small** manufacturing Internet of Things (IoT)

Step 2: Choose your solution

Now that you know your solution type, you can easily select an HPE SMB Solution for Database and / selecting the configuration with the appropriate amount of storage. Note that solution capacity is a fu for storage.

Table 2 provides an overview of the current database solution portfolio, and Tables 3 and 4 provide solution portfolio.
